Daylight Saving Adjustment

MCReport provides optional support for Daylight Saving transitions, by adding or removing raw data. Data files containing a Daylight Saving transition will have an empty period of data added at the beginning transition, and a period of overlapped data removed at the ending transition. Files without a Daylight Saving transition are unaffected.

The Daylight Saving zone is set in MCReport's Global Settings, by selecting **Tools » Settings** from MCReport's main menu. The selected zone will be applied to all datasets. Each zone has an entry per year, to allow for years with exceptional changes.

Adjusting for Daylight Saving

The selected Daylight Saving zone is displayed in each report's header. Transitions that occur within the duration of the report will be listed next to the zone.

Datasets:
Site: [Narrows Loop South] Narrows Bridge South
Input A: 3 - South bound. - Lane= 1, Added to totals. (1.000)
Input B: 3 - South bound. - Lane= 2, Added to totals. (1.000)
Survey Duration: 08:00 Friday, 12 December 2009 -> 17:32 Tuesday, 31 March 2009
Zone: Australia (WA) [03:00 Sunday, 29 March 2009 - -3600]
File: Narrows Loop South24Mar2009.E01 (Plus)
Identifier: AG16FBMZ MC5805-X20 (c)MetroCount 16Oct08
Algorithm: Binned events, 5 minute steps (Interpolate On)
Data type: Vehicle sensors - Separate (Count)

Daylight Saving transitions are indicated in the report header
