# File Search

MReport's File Tree now includes a File Search feature. Simply select a folder you wish to search, and click the **Search** button on MReport's main toolbar.

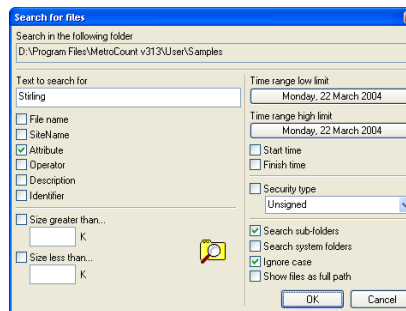

Starting a File Search

Search criteria can include:

- Simple text search of data files' header details, such as Site or Operator.
- Survey start and/or finish times.
- Physical file size.

MReport can search all of a folder's subfolders. Results are displayed in the same list, with each file's full path.

File search criteria
